Thank you for joining the mailing list and as my thanks I am giving you this free report.

Everyday single moms stress out about how to make ends meet or they simply want to work for themselves. With the responsibility of taking care of children it is often necessary to go to work outside of the home. The job may not pay enough to adequately meet the needs of a growing family so you start looking for ways to make extra money.

What is the best way to earn more money? What do I want to do? What are my talents? Will it take up too much time? These are some of the questions that float around in the mind when contemplating working a side gig. Other questions include: How much do I have to pay to start a business? How soon will I see a return on my investment? Are there any free ways to make money? With so many questions that need answers it is no wonder many people give up.

The best advice I can give is to just start. There is something you can do to make a little extra money. You have a skill that someone wants. You have something to offer that others would gladly pay for. To help you out I've listed over 200 side businesses ideas. Choose the one that works for you. Set a goal to make at least \$100 from the business then decide if you want to continue with it. If you don't make any money, choose another business. The key is to find something you enjoy doing and making it work. If you don't find exactly what you want to do on this list use it to spark other ideas.

These ideas are pretty timeless but they can get a modern twist by implementing a few internet marketing skills. Use the internet to market and sell your product or services. The least you can do is put up a webpage to let people know about your services. Use free classified ads to spread the word and as you get the hang of your business start writing articles that relate to your business to drive traffic to your website.

There is a lot to learn about running a business and the internet is full of resources. Search for this information and learn all you can, but for now just get started. Don't let the number of ideas overwhelm you. You can always come back to the list later when you want something else or want to add another stream of income.

Feel free to contact me if you would like help developing your ideas. I am more than happy to help. Also remember to visit <http://richsinglemomma.com> often for new articles, tips, and free resources.

All the best,
Samantha
